Stainless Steel Price Computing Scale

Trade approved digital retail scale

15kg capacity, accuracy to 2g

IP68-rated, waterproof stainless steel casing

Battery or mains operated with 600 hours' battery life

Price base - switchable

## Retail Scale

### Digi DS-781SS:

A trade approved, waterproof digital retail scale

The Digi DS-781SS is a stainless steel price computing scale, perfect for market stalls and small shops where it needs to withstand regular use, particularly in wet or humid conditions.

### Why the Digi DS-781SS?

The Digi DS-781SS is a stainless steel digital retail scale - trade approved so that it can be used front-of-shop, and IP68 rated so that it can be used in wet or humid conditions. It has 99 PLUs and can be mains or battery operated - making it perfect for market stalls and small shops alike.

Displays front and rear mean both you and the customer can see the weight and price of goods clearly. It is price base switchable between price per kg and price per 100g.

IP68 Rated Casing

## Retail Scales

### It's trade approved

Only those scales that are Class III approved - or trade approved - can be used in the process of buying and selling of goods.

The DS-781SS is unlike most retail scales you will find in that it is a digital, trade approved scale that not only boasts fantastic accuracy (EC approved, 1/3000 display resolution; graduation to 2g) but can also withstand harsher environments, thanks to its IP68-rated stainless steel casing.

1/3000 Display Resolution

### It can be washed down

An IP68-rated stainless steel casing on the DS-781SS keeps it waterproof, meaning it'll last longer in wet or humid conditions than a standard retail scale. It also means the DS-781SS can be washed down every day after use, keeping it clean, tidy and hygienic.

Waterproof Casing

## You can take it anywhere

As well as having a stainless steel, waterproof casing, the DS-781SS can run from battery power continuously for at least 600 hours (non-rechargeable). It means that you can place the scale anywhere regardless of where the nearest plug socket is, and not worry about losing battery power.

This makes it the essential choice for both small shops and market stall traders.

An AC adaptor is included should you wish to power it from a mains connection instead.

Over 600 Hours' Wireless Use

## Product Specifications

Class III Approval

Capacity: 15kg

Graduations: 2/5g

Power Supply: AC adaptor or 4 x non-rechargeable C-size batteries

Scale Dimensions: 300mm (w) x 340mm (d) x 135mm (h)
